Bri May

AI-Native Senior Product Designer

I design the product, then I ship the code.

Pleasanton, CA · imbrimay.com · github.com/thebrimay-wq · linkedin.com/in/brimay · thebrimay@gmail.com

Senior product designer who designs the product, then ships the code, using AI in both halves. Built an AI content and localization studio solo with Claude Code (TypeScript, Lit, Cloudflare Workers, the Anthropic API) that took Financial Finesse's library into 25 live markets; designed the Aimee AI coach for three surfaces and merged its token layer into the production SDK; led the 2024 Hub redesign from research through launch.

3,512
Localized pieces shipped in one four-day run · 10 new locales · 1 designer

28 locales
Global Content Studio in production · 8,118 localized variants · 221 tests

+200%
Engagement after the 2024 Hub redesign I led · internal reporting

Experience

Financial Finesse — 2016 – Present

Federal Reserve · Meta · NFL · JPMorgan Chase · Nestlé · Patagonia · Comcast · McKinsey

AI-Native Senior Product Designer, AI Team — 2025 – Present

– Owned **Global Content Studio** end to end: saw writers drafting company content on unregulated AI tools, defined the product, designed the author and localizer workflows, and built it solo with Claude Code (TypeScript + Lit, a Cloudflare Worker proxying the Anthropic API and fronting Azure Blob Storage, 221 tests). First commit to launch QA in four weeks; one four-day run localized **3,512 pieces** and brought 10 locales live; **8,118 variants** across 28 locales in the live index (Sep 2026). imbrimay.com/work/global-content-studio

– Designed the Studio's review model: the model's self-score only routes, a separate verify pass with typed failures and deterministic checks gate, and a localizer approves before anything publishes. After a batch run overwrote approved work, made approved a state automation cannot cross.

– Designed **Aimee**, the AI financial coach, for the Hub, an embeddable client widget, and Microsoft Teams: coded prototypes with real streaming and state, the design-system spec, and the component library engineering built the React + A2UI SDK from; then merged the token layer and four components into that production SDK myself (32 commits). imbrimay.com/aimee-ai

– Own the design system as code: tokens as CSS custom properties and WCAG AA components in light and dark, running in the Aimee SDK, the Studio, and the Hub's Content Studio.

– Ship production code in the company's core repos: the Hub's Content Studio and localizer review queue (TypeScript + Lit, 80 commits) and the localization review API and console (Python + React, 27 commits), both with tests.

Lead Product Designer · Product Creative Director — 2017 – 2025

– Led the 2024 Hub redesign from research through launch, turning a static content library into a guided plan (assessment, action plan, recommended content, coach access) across web and mobile; internal reporting credited it with **+200% engagement**. Served employer customers including Meta and the Federal Reserve. imbrimay.com/work/hub

– Moved the organization from marketing-led to product-led design; owned UX and UI for dashboards, onboarding, and the content ecosystem across web and mobile.

– Introduced user research and usability testing; set the design standards and quality bar as the practice scaled.

Sr. Graphic Designer — 2016 – 2017

– Built the brand identity and first design systems across web and marketing; the role grew into product design within a year.

CKC Communications · Graphic Designer — 2012 – 2015

– Branding, websites, and campaigns for 50+ companies across industries.

Skills

Engineering: TypeScript, JavaScript, React, Lit, HTML & CSS, Tailwind, Vite, Design tokens, Accessible UI (WCAG AA), Cloudflare Workers, Azure Blob Storage, Python, Vitest & Playwright, Git, CI

AI: Claude Code, Anthropic API, RAG and grounding (per-locale wiki), Evals and human-in-the-loop QA, Multi-pass LLM pipelines, Conversational UX

Design: Product design (0→1), Design systems, Prototyping in code, User research, Interaction and motion, Figma

Education

2012 – 2015 — **California State University, Chico** · B.S. Business, Marketing · D1 soccer, full athletic scholarship

2 years — **Arizona State University** · D1 soccer
