Bri May

AI-Native Senior Design Engineer

I design the product, then I ship the code.

Pleasanton, CA · imbrimay.com · github.com/thebrimay-wq · linkedin.com/in/brimay · thebrimay@gmail.com

Senior design engineer who designs the product, then ships the code, using AI across both. Built an AI content and localization studio solo with Claude Code (TypeScript, Lit, Cloudflare Workers, Anthropic API) that took Financial Finesse's library into 28 live locales; designed the Aimee AI coach for three surfaces, coded prototypes with real streaming, and merged the token layer and four components into the production React SDK. Built the company's design system from scratch and led the 2024 Hub redesign from research through launch.

3,512	8,118	+200%
pieces localized in one four-day production run	variants across 28 locales in the live index	engagement after the 2024 Hub redesign

EXPERIENCE

Financial Finesse

2016 - Present

AI-Native Senior Product Designer, AI Team | 2025 - Present

- **Owned Global Content Studio end to end:** identified unregulated AI use in content production, defined the product, designed author and localizer workflows, and built it solo with Claude Code using TypeScript, Lit, a Cloudflare Worker, the Anthropic API, and Azure Blob Storage. Shipped launch QA four weeks after the first commit with 221 automated tests in Vitest and Playwright. imbrimay.com/work/global-content-studio
- **Designed quality as evals, not vibes:** the model's self-score only routes; an independent verify pass with typed failures and deterministic checks gates; a localizer approves before anything publishes. Ran the en-GB gate as a standing eval on 75 real articles: 13 rewritten as UK-native pieces, 62 dropped as unlocalizable. Every expensive architecture call traces to something counted: the five-call pipeline exists because one-pass output kept US framing no check could see; skip-approved exists because measurement showed re-runs discarded human edits.
- **Designed Aimee, the AI financial coach, across three surfaces:** the Hub, an embeddable client widget, and Microsoft Teams. Coded prototypes with real streaming and state. Designed the streaming UX: token streaming with stop control, interruption handling, mid-stream failure recovery that resumes rather than restarts, and safe markdown rendering. In a financial context a silently truncated answer is a liability, so truncation is never silent. Authored the design-system specification, then merged the token layer and four components into the production React + A2UI SDK. imbrimay.com/aimee-ai
- **Ship production code in core repositories:** the Hub Content Studio and localizer review queue in TypeScript + Lit (80 commits), plus the localization review API and console in Python + React (27 commits), both with tests.
- **Own the design system as code:** tokens as CSS custom properties with light and dark theming, WCAG AA hard rules, and a locked component API with documented anatomy and CSS contracts. Adopted across three production surfaces from one codebase; engineering built the React + A2UI SDK 1:1 from my spec.
- **Verification is a habit:** decompose before delegating, brief the model with real context, read every diff for state/effect bugs and a11y misses, 221 Vitest tests, manual QA passes. 493 of the Studio's 524 commits are mine.

INDEPENDENT PROJECT

Brix · On-device AI assistant

Designed and built an on-device AI assistant end to end: product definition, interface design, and implementation. imbrimay.com

EXPERIENCE, CONTINUED

Financial Finesse

2017 - 2025

Lead Product Designer · Product Creative Director

Employer customers included Federal Reserve · Meta · NFL · JPMorgan Chase · Nestlé · Patagonia · Comcast · McKinsey

- **Led the 2024 Hub redesign from research through launch,** turning a static content library into a guided plan with assessment, action plan, recommended content, and coach access across web and mobile. Internal reporting credited the redesign with +200% engagement. imbrimay.com/work/hub
- **Moved the organization from marketing-led to product-led design;** owned UX and UI for dashboards, onboarding, and the content ecosystem across web and mobile.
- **Introduced user research and usability testing;** established the design standards and quality bar as the practice scaled.

Financial Finesse

2016 - 2017

Senior Graphic Designer

- Built the brand identity and first design systems across web and marketing; the role expanded into product design within a year.

CKC Communications

2012 - 2015

Graphic Designer

- Created brands, websites, and campaigns for more than 50 companies across industries.

SKILLS

ENGINEERING	TypeScript, JavaScript, React, Lit, HTML & CSS, Tailwind, Vite, design tokens, accessible UI (WCAG AA), Cloudflare Workers, Azure Blob Storage, Python, Vitest, Playwright, Git, CI
AI SYSTEMS	Claude Code, Anthropic API, retrieval-augmented generation and grounding, evals, human-in-the-loop QA, multi-pass LLM pipelines, conversational UX
PRODUCT DESIGN	0-to-1 product design, design systems, prototyping in code, user research, interaction and motion, Figma

EDUCATION

2012 - 2015	**California State University, Chico** · B.S. Business, Marketing · D1 soccer, full athletic scholarship
2 years	**Arizona State University** · D1 soccer

Positioning: AI-native builder with product judgment, interaction craft, systems thinking, and production code in the same loop.
