pieces localized in one four-day production run	variants across 28 locales in the index (Sep 2026)	engagement after the 2024 Hub redesign

EXPERIENCE

Financial Finesse — 2016 – Present

AI-Native Senior Product Designer · AI Team — 2025 – Present

- **Owned Global Content Studio end to end.** Spotted unregulated AI use in content production, defined the product, designed author and localizer workflows, and built v1 with Claude Code (TypeScript, Lit, Cloudflare Workers, Anthropic API, Azure Blob Storage). Shipped launch QA four weeks after the first commit with 221 automated tests; 493 of 524 commits are mine. imbrimay.com/work/global-content-studio
- **Designed quality as evals.** The model's self-score only routes; an independent verify pass with typed failures and deterministic checks gates; a localizer approves before anything publishes. On 75 real en-GB articles, the gate rewrote 13 as UK-native pieces and dropped 62
- **Designed Aimee, the AI financial coach,** for the Hub, a client widget, and Microsoft Teams. Coded prototypes with real streaming, stop control, and mid-stream recovery. Merged the token layer and four components into the production React + A2UI SDK. imbrimay.com/aimee-ai
- **Ship production code and own the design system.** Review screens in the admin platform in TypeScript + Lit (81 commits); review API and console on the pipeline platform in Python + React (113 commits). Design tokens with light and dark themes and WCAG AA rules, merged into the Aimee SDK, the Studio, and the admin platform

Lead Product Designer · Product Creative Director — 2017 – 2025

Financial Finesse customers include the Federal Reserve, Meta, NFL, JPMorgan Chase, Nestlé, Patagonia, Comcast, McKinsey

- **Led the 2024 Hub redesign from research through launch,** turning a static content library into a guided plan with assessment, action plan, recommended content, and coach access across web and mobile. Internal reporting credited it with +200% engagement. imbrimay.com/work/hub
- **Moved the organization from marketing-led to product-led design;** owned UX and UI for dashboards, onboarding, and content, and introduced user research and usability testing

Senior Graphic Designer — 2016 – 2017

- Built the brand identity and first design systems; the role grew into product design within a year

CKC Communications · Graphic Designer — 2012 – 2015

- Created brands, websites, and campaigns for more than 50 companies across industries

PROJECT

Brix · On-device AI assistant, designed and built end to end — imbrimay.com

SKILLS

Engineering	TypeScript, JavaScript, React, Lit, HTML & CSS, Tailwind, Vite, design tokens, accessible UI (WCAG AA), Cloudflare Workers, Azure Blob Storage, Python, Vitest, Playwright, Git, CI
AI systems	Claude Code, Anthropic API, retrieval-augmented generation and grounding, evals, human-in-the-loop QA, multi-pass LLM pipelines, conversational UX
Design	0-to-1 product design, design systems, prototyping in code, user research, interaction and motion, Figma

EDUCATION

California State University, Chico · B.S. Business, Marketing · Full-ride soccer scholarship — 2012 – 2015

Arizona State University · D1 soccer, full-ride scholarship — 2 years
