

Bri May

AI-Native Product Designer · Design Engineer

Pleasanton, CA

thebrimay@gmail.com

imbrimay.com · linkedin.com/in/brimay

A designer who ships. Ten years of product design, spent in the seam between design and engineering — turning Figma systems into production React front-ends and rapidly prototyping AI-native products from concept to launch. Built the **AI Global Content Studio** solo, end to end, in one month — scaling global launches to one country per week and winning the Federal Reserve as a client. My work has driven **200%+ engagement growth** and contributed to **\$12M+ in revenue**.

EXPERIENCE

Financial Finesse

2015 – Present

Bringing Financial Wellness to the 99% — our mission is to change financial lives.

Select clients: Federal Reserve · Meta · NFL · JPMorgan Chase · Nestlé · Patagonia · Comcast · McKinsey

AI-Native Product Designer · Design Engineer

2025 – Present

- Design and ship production front-ends in **React** — translating Figma design systems into responsive, accessible, tokenized components in code
- Saw a gap in the company and built the **AI Global Content Studio** end to end — designed and shipped the entire app solo with AI, no engineers, in **one month**. It saved millions of dollars, scaled global launches from months to **one country per week**, and won the **Federal Reserve** as a client
- Designed & launched **Smart Benefits**, an AI-powered SaaS platform adopted by one of the largest U.S. retirement record keepers and used within Olympic organizations
- Build and maintain the cross-surface design system (Figma → code); prototype AI-powered flows and hand off pixel-accurate, buildable specs
- Own the design direction and system standards across the product — from Figma tokens to shipped, accessible React UI

Lead Product Designer · Product Creative Director

2016 – 2025

- Transitioned the org from marketing-led design to a product-led practice; owned UX/UI for dashboards, onboarding, and content ecosystems
- Rapidly prototyped and shipped features with engineering; introduced user testing and research to inform product decisions and lift activation

Sr. Graphic Designer

2015 – 2016

- Built the foundational brand identity and earliest design systems across web and marketing — the year the role grew into product design

CKC Communications

2012 – 2015

Graphic Designer

- Delivered branding, websites, and campaigns for **50+ companies** across industries — where I learned to move fast without losing craft

SKILLS

Design & Product

Product Design (0→1) · UX / UI · Design Systems · Interaction & Motion · Prototyping · User Research & Testing · Figma

Engineering

React · JavaScript (ES6+) · HTML5 & CSS3 · Framer Motion · Vite · Design Tokens · Responsive & Accessible UI · Git / GitHub · CI & Static Deploy

AI-Native

AI Product Design · Rapid AI Prototyping · LLM-Powered Features · Conversational / Agent UX · Prompt Engineering · AI-Assisted Coding

EDUCATION

California State University, Chico

2012 – 2015

B.S. Business, Marketing · Soccer, full-ride athletic scholarship

Arizona State University

2 years

D1 Soccer, full-ride athletic scholarship
