

Bri May

I design and **ship**. Ten years in the seam between design and engineering, turning Figma systems into production **React** front-ends and prototyping **AI-native** products from concept to launch.

SOLO APP, CONCEPT TO SHIP

CAPABILITIES

DESIGN

Product design (0 → 1), UX/UI, design systems, interaction & motion, prototyping, research

ENGINEERING

React, JavaScript, HTML & CSS, design tokens, accessible UI, Git, CI

AI-NATIVE

AI product design, LLM features, conversational & agent UX, prompt engineering

SELECT CLIENTS

Federal Reserve, Meta, NFL, JPMorgan, Chase, Nestlé, Patagonia, McKinsey

EDUCATION

CSU, Chico

B.S. Business, Marketing · Full-ride soccer scholarship

Arizona State University

Coursework, 2 yrs · Full-ride soccer scholarship

01 EXPERIENCE

Financial Finesse

2016 — PRESENT

AI-Native Product Designer & Design Engineer

2025 — PRESENT

- Design and ship production front-ends in React, translating Figma design systems into responsive, accessible, tokenized components in code.
- Built the **AI Global Content Studio** end to end, shipping the entire app solo with AI in one month; saved millions, scaled global launches to **one country per week**, and won the **Federal Reserve** as a client.
- Designed and launched **Smart Benefits**, an AI-powered SaaS platform adopted by one of the largest U.S. retirement record keepers and used within Olympic organizations.
- Build and maintain the cross-surface design system (Figma to code), prototype AI-powered user flows, and hand off pixel-accurate, buildable specs to engineering.
- Own **0-to-1** design direction and system standards across the product, from Figma design tokens to shipped, accessible React UI.
- Designed **Aimee**, an AI coaching experience with conversational onboarding and a personalization system, applying conversational and agent UX patterns.

Lead Product Designer & Product Creative Director

2017 — 2025

- Transitioned the organization from marketing-led design to a product-led practice; owned UX/UI for dashboards, onboarding, and content ecosystems.
- Led cross-functional collaboration with engineering and stakeholders to rapidly prototype and ship features from concept to launch.
- Introduced user research and usability testing to inform product decisions and lift activation.
- Directed design strategy and guided design work as the practice scaled, establishing standards, processes, and the quality bar.

Senior Graphic Designer

2016 — 2017

- Built the foundational brand identity and earliest design systems across web and marketing, the year the role grew into product design.

CKC Communications

2012 — 2015

Graphic Designer

2012 — 2015

- Delivered branding, websites, and campaigns for **50+ companies** across industries, learning to move fast without losing craft.
